

# THANH HUNG, NGUYEN

FullStack Developer

## PERSONAL INFORMATION

---

- Full name: Nguyễn Thanh Hùng
- Phone No.: 0399 7777 19
- Email: [hungnt.net@gmail.com](mailto:hungnt.net@gmail.com)
- Address: District 9, TP HCM
- Software engineer experienced: over 9 years

## Summary

---

I have a lot of experience in working on outsourcing.

My contribution:

- Collaborate with other teams (Operation team, Biz team, Others technical team) to improve and fulfill the product direction.
- Research and apply new technology to the project.
- Research and build structures for core projects

## Education

---

2011 – 2014

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY (HUTECH)

Specialized: Network Administrators

## Skill

---

Programming

**Javascript**: NodeJs, ReactJs (NextJs), **Golang**

Database

**Mysql, Mongo, Redis ...**

Management

Task Management, Bug Tracking (Jira, Asana)

Soft Skill

Leadership & Mentoring , Teamwork, Logical Thinking, Researching, Task Estimation and

Planning, Time Management

## Overview Experience

---

March 2024 – Present

**Datviet VAC**

Team Leader

Jan 2020 – March 2024

**Joy Software**

Team Leader

Dec 2018 – Jan 2020

**VinHMS – VinTech**

Software Engineer

Jan 2016 – Dec 2018

**Alibaba Advertising**

Full Stack Developer

Aug 2014 – Jan 2016

**Khoa Pham Training**  
PHP Developer, Lecturers

Sep 2011 – July 2014

**BHD MEDIA JOINT STOCK COMPANY**  
Network Administrators

## Working Experience

---

March 2024 – Present

**Team Leader**  
Company: DatViet VAC

### Team size: 8

- Leading and managing the **Backend** team in the development of products, ensuring quality and performance.
- Building and maintaining **Backend** architecture for applications, ensuring scalability and readiness for future changes.
- Supporting recruitment and training of new employees, facilitating their quick integration and effective contribution to projects.
- Contributing to user interface design and enhancing user experience.
- Collaborating closely with other departments such as design, backend, and product management to ensure consistency and efficiency of the application.

### Work in 3 project:

#### Project 1: Vieon Application

- Description: VieON is a leading Vietnamese OTT platform that aggregates diverse entertainment content - live TV channels, on-demand movies, series, and sports— alongside exclusive originals and interactive features, delivering seamless, cross-device viewing experiences to millions of users..
- Technologies: **Golang, React JS, Next JS, MySQL, Mongo, Redis, Elasticsearch**
- Team size: 10
- Position: Team Leader
- Responsibility:
  - Support CS team in reporting and daily transactions
  - Refactored the system for the VieON application.
  - Developed the Core V2 system for the VieON application. – **Golang**
  - Rebuilt the payment system, SSO for DatViet VAC – **Golang**
  - Improved the quality of existing APIs and the streaming system

#### Project 2: Admin Dashboard

- Description: **Customer Management & Feedback System** – Developed an admin platform enabling management teams to update product/service information and receive customer feedback. The system streamlined customer service workflows, allowing support teams to handle requests efficiently, track interaction history, and improve service quality.
- Technologies: **Micro-Frontend, Golang, React JS, Next JS, VueJs, MySQL, Mongo, Redis**
- Team size: 5
- Position: Team Leader
- Responsibility:
  - Support CS team in reporting and daily transactions
  - Designed and developed the admin portal using micro-frontend architecture, integrating multiple frameworks (**ReactJS, Next.js, Vue.js**) for modular and scalable UI.
  - Built backend services with **Go (Golang)** to handle business logic, authentication, and API endpoints.

- Collaborated with cross-functional teams (UI/UX, QA, Product Owners) to align features with business needs.

### **Project 3:** VieShop Website

- Description: VieSHOP is the official merchandise storefront for DatVietVAC's entertainment brands, offering licensed products—from apparel and accessories to collectibles—for shows like Rap Việt and The Masked Singer, with an intuitive catalog, secure checkout, and fast delivery.
- Technologies: ***Golang, Wordpress, MySQL***
- Team size: 3
- Responsibility:
  - Support CS team in reporting and daily transactions
  - Improved the quality of the website.
  - Developed additional features for the website - ***Golang***

Jan 2020 – March 2024

### **Team Leader**

Company: Joy Software

### **Team size: 8**

- Leading and managing the **Frontend** team in the development of products, ensuring quality and performance.
- Building and maintaining (**Backend - Frontend**) architecture for applications, ensuring scalability and readiness for future changes.
- Supporting recruitment and training of new employees, facilitating their quick integration and effective contribution to projects.
- Contributing to user interface design and enhancing user experience.
- Collaborating closely with other departments such as design, backend, and product management to ensure consistency and efficiency of the application.

### **Work in 3 project:**

#### **Project 1:** Platform VNAmazing

- Description: VNAmazing is a project implemented by Vietnam Airlines to create the largest platform to help the airline and its travel partners expand their sales into VNA's ecosystem, helping VNA to actively sell all both hotel voucher combo products and air tickets as well as genuine package tour products to customers.
- Technologies: ***Golang, React JS, Next JS, MySQL, Mongo, Redis, Elasticsearch***
- Team size: 4
- Position: Team Leader
- Responsibility:
  - Support CS team in reporting and daily transactions
  - Implement admin tool features – ***ReactJS***
  - Implement Front-end features – ***NextJS***
  - Participate in the development of the API system. - ***Golang***
  - Support on product declaration to each station

#### **Project 2:** Platform BookUs

- Description: Bookus is an air ticket booking and management system that makes it easy for customers to book their flight tickets. The system helps travel companies easily approach customers, manage customer debts, and automatically pay debts with a variety of payment methods such as online payment, top-up, transfer, pay-out. after contract.
- Technologies: ***Golang, React JS, Next JS, MySQL, Golang, Redis, Elasticsearch***
- Team size: 4
- Position: Team Leader
- Responsibility:
  - Support CS team in reporting and daily transactions
  - Implement Front-end features using ***Nextjs***
  - Admin Tool features using ***ReactJs***
  - Integrate flight ticket systems from multiple agency sources.

### **Project 3:** Yeudulich.com

- Description: The largest package tour platform in Vietnam, gathering thousands of attractive travel products from hundreds of the best travel companies in Vietnam. Vendors can create products, promotions automatically.
- Technologies: ***Node JS, React JS, Next JS, MySQL, Redis, Elasticsearch***
- Team size: 2
- Position: Front-end development
- Responsibility:
  - Support CS team in reporting and daily transactions
  - Implement admin tool features – ***React JS***
  - Implement Front-end features – ***Next JS***
  - Support on product declaration to each station

Dec 2018 – Jan 2020

### **Software Engineer**

Company: VinHMS – Vingroup

#### **Team size: 8**

- Participate in the development of projects for the VinGroup corporation
- Research new technologies and conduct workshops to enhance team members' knowledge
- Collaborate with third-party partners to integrate systems such as payment gateways, airline ticketing platforms, and hotel reservation systems

### **Work in 4 project:**

#### **Project 1:** Vinfast Battery Swapping Application Service

- Description: This application is a full system from admin tool to mobile app supporting for over 1500 stations that help customers who use Vinfast E scooter registering, exchanging, renting batteries.
- Technologies: ***NodeJs, React JS, MySQL, Redis***
- Team size: 9
- Position: Full stack development
- Responsibility:
  - Developed and maintained backend APIs using ***NodeJs***
  - Support CS team in reporting and daily transactions
  - Designed and implemented admin portal frontend features using ***ReactJs***.
  - Support on product declaration to each station

#### **Project 2:** Payment Service for Vinpearl Travel

- Description: Vinpearl Travel Application is a micro-services system. Payment service is used as a middle-ware to connect with other Payment Gateway like OnePay, 123Pay, VinID.
- Technologies: ***Golang, Redis, MySQL***
- Team size: 3
- Position: Full stack development
- Responsibility:
  - Coordinated closely with third-party payment gateways. (OnePay, Vnpay, 123Pay, VinID ...)
  - Coordinated closely with third-party airline ticketing platforms, and hotel reservation systems (Vinpearl)
  - Designed and implemented admin portal frontend features using ***ReactJs***.
  - Developed and maintained backend APIs using ***Golang***

#### **Project 3:** Vinpearl Evoucher

- Description: Vinpearl Evoucher is the distribution system for the promotions of Vinpearl system in Vingroup.
- Technologies: ***.Net core, React JS, Redis, MySQL***
- Team size: 5
- Position: Frontend development
- Responsibility:
  - Implement website evoucher features – ***React JS***

- Communicate with third-party partner (OnePay, 123Pay, VinID, VNPay)
- Implement the management features in the admin tool – **React JS**

#### **Project 4:** Vinpearl Travel

- Description: Vinpearl Travel is an e-commerce system including: Air tickets, vouchers, hotel reservations. Connect to payment gateways such as VinId, OnePay, VNPay ...
- Technologies: **.Net core, React JS, Next JS, Redis, Elasticsearch, MySQL**
- Team size: 12
- Position: Frontend development
- Responsibility:
  - Collaborated with other teams including BA, DevOps, QC, and microservices teams to ensure seamless integration and deployment.
  - Integrated internal payment gateway systems into company products.
  - Designed and implemented Front-end (SSR) features using **NextJs** and Admin tool (**ReactJs**)

Jan 2016 – Dec 2018

#### **Full Stack Developer**

Company: ALIBABA ADVERTISING

**Description:** This is a company specializing in website development and advertising. The company includes many branches across the country.

**Technologies:** *Php (Laravel), React JS, Redis, Elasticsearch, MySQL, Github, Jira*

**Team Size:** 12

**Position:** Full Stack Development

**Responsibility:**

- Do Requirement analyzing, Task estimation, Resource estimation, Risk estimation
- Design system architecture
- Provide technical advice for customer
- Implement website features
- Implement admin tool features
- Manage and support task teams

Aug 2014 – Jan 2016

#### **Software Engineer**

**Lecturers**

Company: KHOA PHAM TRAINING

Main Role:

- Software Engineer
- Lecturers

**Description:** Khoapham Training is a Education center, specializing in training programming languages (PHP, Php framework, iOS, Android ....).

**Technologies:** *PHP, iOS, Android, MySQL, Github ...*

**Team Size:** 20

- **Position:** Software Engineer, Lecturers

**Responsibility:**

- Design system architecture
- Research programming languages
- Manage projects of the center
- Implement project features

Sep 2011 – July 2014

**NETWORK ADMINISTRATORS**

Company: BHD MEDIA JOINT STOCK COMPANY

Main Role:

- System administration throughout the company.
- Deploy, Support live broadcast system
- Administration of livestream system
